Institutional Accreditation
Compliance Reports

AREA VIII — INFRASTRUCTURE AND OTHER LEARNING SOURCES

	RECOMMENDATIONS	ACTION/S TAKEN	SUPPORTING DOCUMENT/S	LINK TO THE SUPPORTING DOCUMENT/S	ADDITIONAL SUPPORTING DOCUMENTS	REMARKS
1	The Institution may harmonize and fine-tune some provisions in the Land Use Development and Infrastructure Plan (LUDIP) as required by RA 11396.	The approved Land Use and Development Infrastructure Plan (LUDIP)of Bicol University is periodically updated. Recently, the Commission on Higher Education conducted the third round of site validation across all university campuses to see and check whether the approved LUDIP is being implemented across the university.	-Office Memo BU OP No 25 S 2024 that creates a committee to conduct mandatory review of LUDIP -CHED letter regarding the schedule of LUDIP Site validation - Office Memo BU Op No. 271 S2024 CHED LUDIP Site Visit -Photo documentations during the site visit	Link to the Supporting Documents for Recommendation # 1	Link to the Additional File	
2	Strengthen the computerization program and projects for LUDIP monitoring and evaluation across all units in the University.	The Information and Communication Technology Office (ICTO) is currently in the process of developing a comprehensive Property and Inventory Management System called Bicol University Asset Management System (BUAMS) that will streamline the monitoring and tracking of all assets acquired by the university. This system will not only improve efficiency in asset management but also aid in the monitoring and implementation of the Land Use and Development Plan (LUDIP) across the entire university campus. By centralizing asset information and automating inventory processes, the Property and Inventory Management System will provide real-time data on the status and condition of university assets, ultimately promoting better decision-making and resource allocation. Additionally, the system will facilitate compliance with regulations and improve transparency in asset management practices. Overall, the implementation of this system is poised to enhance operational effectiveness and accountability within the university. 3	The procurement of GIS licensed software may be considered by the Office concerned in the University.	The university already purchased a licensed Geographic Information System software	copy of contract	Link to the Supporting Documents for Recommendation # 3		
4	Promote Rain Water Harvesting to augment the shortage of water facility and sources in the University.	Rainwater harvester were incorporated in the plans of future projects for implementation.	1. sample project plans for implementation in 2024 2. Colleges' WFP / PPMP 3. pictures of the existing Rain Water Harvester set-up.	Link to the Supporting Documents for Recommendation # 4		
5	Institutionalize ordinances/policies on "Zero Plastic and Styrofoam Free" in the campus.	Interim Waste Management Plan is formulated to provide a directional process to address the rapidly growing problem of handling wastes that affect the environment.	copy of AO No 943 S2024	Link to the Supporting Documents for Recommendation # 5		
6	Strengthen the ICT facilities and resources of the University.		Copy of the Proposed ISSP 2024-2026 submitted to the DICT and DBM for approval . Copy of Project TOR and Contract (PrMO) . Copy of Service Contract of PLDT, Globe, & Converge (PrMO) . Copy of Service Contract of PLDT (PrMO) . Copy of Service Contract of MyCreative Panda (PrMO)	Link to the Supporting Documents for Recommendation # 6
