Best Practice:

1	The BU-ICTO Service Request System is considered a best practice in the office because it promotes efficiency, organization, and accountability. By centralizing IT requests, it allows staff and faculty to easily report technical issues and track progress in real time. This reduces communication delays, ensures proper documentation of requests, and helps prioritize tasks based on urgency. The system also improves accountability, as it provides a clear record of resolved issues and response times, leading to better resource management and faster IT support across the university.
2	Digitizing the Clientele Satisfaction Measurement (CSM) form from paper-based to online is a best practice in the university because it improves efficiency, accessibility, and data accuracy. An online system allows clients to submit feedback instantly from anywhere, reducing delays and eliminating the need for manual handling of paper forms. It also streamlines data collection and analysis, enabling faster response to client concerns. Moreover, digital forms ensure better data security, reduce the risk of lost or damaged records, and support the university's sustainability efforts by minimizing paper use.
3	Implementing training for BU-ICTO professionals is a best practice in the university as it continuously enhances their technical skills and keeps them updated on the latest technologies and industry practices. This ongoing education improves service delivery, leading to quicker response times and effective problem resolution, which increases satisfaction among faculty, staff, and students. Additionally, training optimizes workflows, reduces system downtime, and prepares staff to adapt to new tools and methodologies, ensuring swift responses to challenges. By fostering collaboration and knowledge sharing, these programs also boost morale and employee retention, ultimately contributing to a more efficient and effective IT workforce that benefits the entire academic community.

PARAMETER I : RESOURCE GENERATION STRATEGIES

SYSTEMS - INPUTS AND PROCESSES

		LIST OF SUPPORTING DOCUMENTS
S.1	There are mechanisms for the institution to actively appraise potential sources of additional resources to support its development plans.	1. MOA (International & Local Donors); 2. MOA (Research and Extension Funding); and 3. Project Proposal
S.2	The institution has viable and sustainable income-generating projects to support and augment the regular budget appropriated by the government.	1. List of Income Generating Projects; 2. Quarterly Report; 3. Annual Report; and 4. Summary of Revenue of IGPs 2020-2024.

IMPLEMENTATION

		LIST OF SUPPORTING DOCUMENTS

O.2	Funds and other resources derived from specific projects produce the outcomes specified by the funder.	1. List of Research Funding; and 2. Extension Funding
O.3	The monitoring and evaluation of resource generation activities enable the HEI to enhance further initiatives.	1. Accomplishment report; 2. Monthly report; 3. Quarterly report; 4. Financial Status; and 5. Inventories
O.4	Adequate resources plowed into the institution to augment government subsidy.	1. List of best practices; 2. Contract of least; 3. Proposal; and 4. List of Linkages

Best Practice: Distinct prevailing best practices related to Resource Generation

1.Funding for the improvement and maintenance of assets of the university is also raised by accepting public-private partnerships. Under this PPP the Bicol University and the East Java company enter into a contract that will help enhance and improve the existing Bicol University Entrep Centrum and BU Arcade building which can provide additional income to the university. BU works with the private sector to develop its asset to make it more productive and profitable.
2. Bicol University forge linkages with other institutions such as government agencies, non-government organizations and other private individuals and organizations. This is to establish functional linkages with other institutions for fund accessing, research, technology innovation, development, transfer and, more importantly, getting accreditation or seeking membership in some different organizations or enterprise development councils at the local and even national levels. For years, BU has been receiving funds from various government institutions to fund research and extension projects. The university also unceasingly strategizes on tapping various private individuals and institutions here and abroad to who are willing to donate cash or in kind.

3. The Business Affairs Office implements the rigid IGP process which starts with the submission of IGP proposal to the college. This is first evaluated at the college level and passes thru to the BAO for further evaluation before presenting it to the Administrative Council. The proposal is further refined before its submission for BOR approval. Once implemented, continuous monitoring is being done. After each production cycle the viability of the project is evaluated thru the submitted reports prepared by the Accountant of the college. If the project has not been viable for two consecutive cycles, then its operation will be stopped and its remaining funds will be reverted to Fund 164.
